

# Bartosz Łuka

## Software developer

### Bio

I'm Bartek and I love programming, problem solving and learning new stuff. I'm looking for the opportunity to apply my knowledge and gain some more.

### Experience

#### Netcompany

July 2024 – now

Netcompany is one of the largest Danish IT firms. The project I worked on focused on improving internal workflows using (generative) AI. It included:

- chat app (similar to ChatGPT) – using ASP.NET Core + Angular,
- meeting summary with MS Teams integration,
- document review with inline changes and comments aside,
- PR review in Azure DevOps,
- IDE plugins (Visual Studio, IntelliJ IDEA, VS Code),
- helping internal case management based on SharePoint (checking tickets before creation and helping resolving them).

#### Actaware

Jun 2023 – Mar 2024

Actaware is a startup that developed a mobile app to help consumers choose ethical products while shopping. I mainly worked on the backend, which focused on gathering data on consumer products from different APIs.

#### AISP hub

Jun 2021 – Oct 2022

AISP Hub was a startup that built a mobile app to display data from all your bank accounts in a variety of different banks. It was meant to be the last banking app you'll need.

### Personal projects

#### C# analyzer

2025

<https://github.com/bartoszluka/cs-analyzers> This was created to fix the problem with the C# default warning for unused variables.

#### Android Dictionary Generator

2024
